1. Total Overdue Amount (Priority KPI)

KPI

Total € of invoices that are overdue

Description

Main indicator of **cash flow risk** and financial exposure

KSF

Specific: Monitor total overdue invoice amount in real-time

Measurable: Reduce overdue amount by **15%**

Achievable: Use a dashboard to identify high-value overdue invoices and support targeted follow-up

Relevant: Directly improves cash flow and financial control

Time-Bound: Within **3 months**

2. Total Outstanding Amount

KPI

Total € of all unpaid invoices

Description

Used to compare **total outstanding vs overdue portion**

KSF

Specific: Monitor total outstanding invoices and distinguish overdue vs non-overdue

Measurable: Ensure **100% visibility** of outstanding vs overdue amounts

Achievable: Use dashboard segmentation and filtering

Relevant: Helps understand overall financial position

Time-Bound: Within **1 month**

3. Average Payment Time (DSO)

KPI

Average number of days customers take to pay

Description

Measures **payment behavior and performance**

KSF

Specific: Measure and monitor customer payment time

Measurable: Provide accurate average payment time across all invoices

Achievable: Use historical payment data from Exact Globe

Relevant: Helps evaluate efficiency and identify delays

Time-Bound: Within **1 month**

4. Top Debtors (Prioritisation)

KPI

Top 10 clients by overdue amount

Description

Identifies clients:

- With highest overdue amounts
- With longest overdue times

KSF

Specific: Identify clients contributing most to overdue amounts

Measurable: Ensure top 10 debtors are visible and updated **daily**

Achievable: Use dashboard ranking and filtering

Relevant: Supports prioritization of follow-up actions

Time-Bound: Within **1 month**

5. Overdue vs Not Overdue Insight

KPI

% of overdue vs non-overdue invoices

Description

Clear distinction between:

- Total outstanding
- Overdue portion

KSF

Specific: Clearly distinguish overdue vs non-overdue invoices

Measurable: Provide **100% accurate classification** of invoice status

Achievable: Use defined overdue rules in the data model

Relevant: Helps understand actual financial risk

Time-Bound: Within **1 month**
